EDUCATION

Bangalore Institute of Technology **Dec 2022 – Apr 2026**
B.E - Information Science and Engineering - ***CGPA - 8.7*** *Bengaluru,Karnataka*

EXPERIENCE

Brillio | Software Engineer Intern **Mar 2026 – Present**

- Developed an enterprise **Retrieval-Augmented Generation (RAG)** platform using **FastAPI**, **LangChain**, **Azure OpenAI GPT-4o Mini**, **OpenAI Embeddings**, and **ChromaDB** to enable semantic search across internal organizational knowledge bases.
- Built document ingestion, preprocessing, chunking, embedding, and vector indexing pipelines for onboarding guides, policy documents, and enterprise knowledge repositories.
- Developed a **code vulnerability scanner** using **Python**, **FastAPI**, and regex-based static analysis to detect insecure coding patterns and generate **HTML** and **CSV** vulnerability reports.
- Contributing to an AI-driven data engineering Proof of Concept that automates enterprise analytics workflows using specialized AI agents for data discovery, ingestion, schema mapping, data modeling, and code generation.
- Integrated enterprise metadata from **Microsoft Purview** to automate metadata discovery and support analytics-ready data modeling.
- Designed workflows for automated generation of **star schemas**, including fact and dimension tables, reducing manual effort in preparing business intelligence datasets.

PROJECTS

Vaultless | Fastify, TypeScript, Redis, PostgreSQL, PASETO **(GitHub Link)**

Built an ephemeral credential broker for autonomous AI agents using **Fastify**, **TypeScript**, **Redis**, **PostgreSQL**, and **PASETO v4**. Implemented atomic single-use token validation, idempotent credential issuance, immutable audit logging, and fail-closed authorization for secure agent-to-service communication.

FitTrack | Spring Boot, Spring Cloud, RabbitMQ, React **(GitHub Link)**

Developed a full-stack **microservices-based** fitness platform using **Spring Boot**, **Spring Cloud**, **RabbitMQ**, **Keycloak OAuth2 PKCE**, React, PostgreSQL, and MongoDB. Built asynchronous AI workout recommendations powered by Google Gemini with centralized configuration, service discovery, and an API Gateway.

Renewly | FastAPI, Cognee, SQLite, LanceDB **(GitHub Link)**

Designed an AI-powered life-admin memory agent with a dual-backend architecture supporting seamless switching between local **SQLite/LanceDB** and **Cognee Cloud**. Applied dependency inversion through an abstract MemoryPort interface to enable backend independence, intelligent retrieval, and adaptive reminder generation.

NewsNinja | FastAPI, LangChain, OpenRouter, Streamlit **(GitHub Link)**

Built an AI-powered news intelligence platform that aggregates news and social discussions using multi-source scraping, performs LLM-powered summarization with **LangChain** and **OpenRouter**, and generates personalized audio news briefings through automated FastAPI pipelines.

TECHNICAL SKILLS

Languages: Python, Java, SQL (PostgreSQL, MySQL), TypeScript, JavaScript, HTML/CSS

Backend: Spring Boot, Spring Cloud, FastAPI, Fastify, Flask, REST APIs, Microservices

Databases & Messaging: PostgreSQL, MySQL, MongoDB, ChromaDB, SQLite, Redis, RabbitMQ

Developer Tools: Docker, Microsoft Purview, Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, Eclipse, Postman, Tableau

Libraries: LangChain, LangGraph, RAG, Pandas, NumPy, Streamlit, BeautifulSoup, Selenium

CERTIFICATIONS / ACHIEVEMENTS

- Solved **600+ Data Structures and Algorithms problems** on LeetCode
- 100 Days of Code: The Complete Python Pro Bootcamp – Udemy
- Microsoft Excel: Beginner to Advanced (2025) – Udemy
